

species = 220
HYBRID = 230

Parvisepalum

Paph Class

Brachypetalum

species = 221
HYBRID = 231

Pouch thin (with pleats)

Small dorsal, petals wide. Leaves either mottled or plain (*malipoense*, *delenatii*)

Inflorescence very short

Pouch thick, egg-shaped. Flowers single. Petals wide, leaves mottled. (*concolor*, *bellatulum*)

species = 222
HYBRID = 232

**Barbatum /
Sigmatopetalum**

Sepals striped. Leaves mottled.

Flowers single. Small synsepal. (*sukhakulii*, *callosum*, *lawrenceanum*)

species = 223
HYBRID = 233

Cochlopetalum

Petals short, horizontal, and corkscrew-shaped

Flowers sequential. (*primulinum*, *glaucophyllum*)

species = 224
HYBRID = 234

**Insigne /
Paphiopedilum**

Petals narrow and leaves plain.
Sepals not distinctly striped,
except *Paph. fairrie anum*. Flowers
single. Large synsepal. Inflorescence
intermediate length. (*insigne, fairrie anum*)

Paph Class

species = 225
HYBRID = 235

**Coryopetalum &
Pardalopetalum**

Flowers multi-floral
(3 or more flowers
per inflorescence)

Sepals usually striped.
Petals usually long
and downswept.

No species
HYBRID = 236

BULLDOGS

Petals WIDE and leaves plain
Sepals not distinctly striped.
Flowers single. Large synsepal.
Inflorescence intermediate length.

HYBRID = 240

[Hybrids between Subgenera]

Does not fit in other classes.
